Analysis and Comments	Result	Units	Reporting Limit	Notes
Normally: less than 1 mcg/L				
Antimony (Creatinine corrected)	None Detected	mcg/g Creat	1.0	
Analysis by Inductively Coupled Plasma/Mass Spectrometry (ICP/MS)				
Mercury	None Detected	mcg/L	1.0	
Normally: Less than 5 mcg/L.				
Various states require that levels above certain cutoffs must be reported to the state in which the patient resides. Please contact NMS Labs if you need assistance in supplying your state with the required information.				
Mercury (Creatinine corrected)	None Detected	mcg/g Creat	1.0	

Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
